

INTRODUCTION

Remind: [micro:bit board](#) and [batteries](#) are not included.

Here comes Maqueen – micro:bit educational programming robot platform. Maqueen is an easy-to-use micro:bit programming robot for STEAM education, which inherits the playability and simple operation of micro:bit. With a mini body, play-and-play, it allows students to quickly learn graphical programming in an entertaining way while nurturing their interests in science and logical thinking.

Suggest Age: 8 +

Maqueen is accessible to Mind+ Programming platform now. Mind+ is a graphical programming platform from DFRobot, supporting python, Arduino and other programming platforms. At present, Mind+ has been applied to all kinds of [sensors](#), [modules](#) and related [educational products](#).

Affordable

Simple

Playful

Make Robotics
Education Easier

DFROBOT
DRIVE THE FUTURE

Affordable
No budget pressure

Palm size
Small enough to carry and collect

Quick to Assemble
Save time for entire class

Easy to Start
Friendly and playful to beginners

Coding Language path
Learn from blocks to text coding

Powerful
All basic functions you can think of

Wide Extension
DIY projects with endless possibilities

Abundant Teaching content
Online tutorials and guidebook available

**Weapon Maqueen with
micro:bit as brain!**

Stand on the shoulders of giants, enjoy online educational sources together with 4 million children

micro: bit is a tiny programmable computer which is portable and only palm-sized. It is designed for primary and secondary school students to learn digitalized and computer thinking. micro:bit makes teaching and learning simple and fun.

[Learn more](#)

Small but Powerful

Running Maqueen

Powerful drive motor + customized POM bearing wheels

Line Tracking Expert

With line tracking sensor, Maqueen can move and turn around along with certain route.

Sharp Eyes

Take ultrasonic sensor as eyes to avoid obstacle, range and follow object.

Light Chaser

Track light and run towards to it.

Lighting Show

Create music with Buzzer and colorful stage with RGB lights.

Sharp Eyes

Take ultrasonic sensor as eyes to avoid obstacle, range and follow object.

Easy to Build in **60s**

4-step assembly, Fool Proof

Save efforts for entire-class teaching and leave more time to create and play

1. Install wheels

2. Fix battery holder

3. Plug in micro: bit(order separately)

4. Install ultrasonic sensor

New version
Plastic BOX

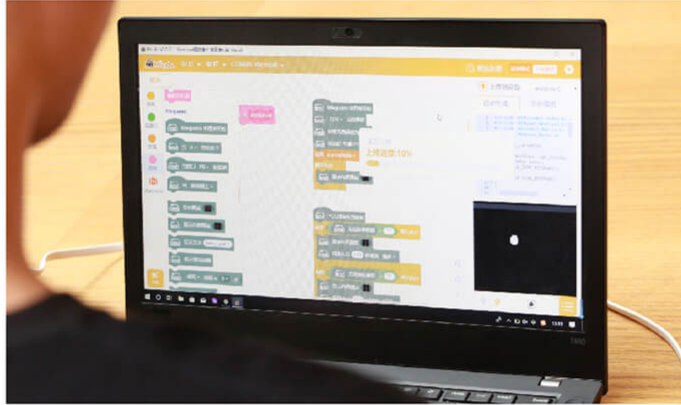

easier to collect and reuse

Start Graphical Programming in **1** Hour

- 1** Graphical Programming, play coding in blocks while learn programming and logical thinking.

- 2** Support multiple platforms: Mind+, Makecode, Scratch, Python; grow from zero to hero.

Mind+

The only thing and everything for kids to start hardware programming.

Preparation

Walking Maqueen

There are 3 playing modes for Crazy Maqueen, and each mode includes missions with different levels. The further you advance, the harder it will be, challenge now!

● Single Player Mode

Players will unlock a piece of basic equipment in each stage

- 1: Walking Maqueen
- 2: Singer Maqueen
- 3: Rhythm Master
- 4: Light Chaser
- 5: Little Tagalong
- 6: Streetcar

● Interactive Mode

Use Maqueen's brain micro:bit to unlock more tools like calculating, drawing, etc.

- 1: little Math Expert
- 2: Dancer
- 3: Drawer

● Multiplayer Mode

Cooperate with your teammates to complete the missions. You could utilize external equipment to accomplish all of the tasks

- 1: Maqueen's Commander
- 2: Motion Controlled Car
- 3: Flying Chess
- 4: Gamepad+Maqueen

SPECIFICATION

Main Body (with all metal gear motor and bearing wheel) x 1

Wheels x 2

Three AAA Batteries Holder x1
Double Sided Adhesive Tape x 1

Ultrasonic Sensor x 1

Quick Start Guide x 1

- ① Infrared Grayscale Sensor(High-low level) x 2
- ② Buzzer x 1
- ③ Infrared Receiver (NEC decoder) x 1
- ④ LED Car Light (High-low level control) x 2
- ⑤ RGB Ambient Light (Full color 16 million) x 4
- ⑥ SR04, SR04P Ultrasonic Interfaces(5V) x 1
- ⑦ I2C (3.3V) x 1
- ⑧ Servo Port x 2
- ⑨ IO Expansion port x 2
- ⑩ micro: bit slot x 1

**BUREAU
VERITAS**

ATTESTATION of conformity with European Directives

Attestation Number: 1988AB0827N055002
Product: micro:Maqueen for microbit Educational Programming Robot
Brand Name: N/A
Model: ROB0148-EN
Additional Model: N/A
Applicant: Chengdu Jiqu Technology Co., Ltd
Address: No.188, KexingRd West, Wenjiang, Chengdu, Sichuan, China
Technical Characteristics: DC 4.5V(1.5V*AAA*3) from Battery

The submitted sample of the above equipment has been tested for  marking according to following European Directive and standards:

- Electromagnetic Compatibility Directive 2014/30/EU

Standards	Report Number	Report date
EN 55014-1:2017 EN 55014-2:2015	CE190827N055	Sep. 18, 2019

The referred test report(s) show that the product complies with standard(s) recognized as giving presumption of compliance with the essential requirements in the specified European Directive.

This verification does not imply assessment of the production of the product. The  marking may be affixed if all relevant and effective European Directives with  are applicable.

White Skin Pack

[Red Skin Pack](#)

We also offer the kit including [micro: Maqueen Lite and skin pack](#), please [click here](#).

(Note: The skin pack is compatible with [micro: Maqueen Lite](#). Not compatible with micro: Maqueen Plus.)

FEATURES

- Support for Makecode, will support Scratch and python later.
- Small size, flexible movement.
- All-metal miniature gear motor, good quality, strong driving force.
- Line patrol, ambient light, LED lights, ultrasonic interface, buzzer, I2C interface, mechanical expansion screw hole, etc. ... full-featured, highly expandable.
 - Exclusive customized POM bearing wheel, flexible and reliable, strong obstacle crossing ability.
 - Easy to install, easy to use.

SPECIFICATION

- Supply Voltage: 3.5V~5V DC (Three AAA batteries or 3.6V~3.7V lithium battery)
- Infrared Grayscale Sensor(High-low level) x 2
- Buzzer x 1
- Infrared Receiver (NEC decoder) x 1
- LED Lights (High-low level control) x 2
- RGB Ambient Light (16 million colors) x 4
- SR04, SR04P Ultrasonic Interface(5V) x 1
- I2C Interface (3.3V) x 1
- Gravity Extension Interfaces (P1, P2) x 2
- N20 All-metal Gear Motor x 2
- Motor Reduction Ratio: 1:150
- Motor Drive Mode: PWM motor drive
- Bracket and Protective Cover Extension M3 Screw Hole x 6
- Programming Method: Makecode graphical programming, [Mind+ graphical programming](#)
- Dimension: 81mm x 85 mm x 44mm/3.19 x 3.35 x 1.73in
- Weight: 75.55g
